

MyAgData® and the Cloud

An increasing number of agricultural industry organizations are offering their own proprietary cloud data storage solutions to make it easier to access your data and to enable increased collaboration.

Your as-applied planting data stored in an equipment manufacturer or third-party cloud can be pulled and used for your acreage report.

Make the Connection

Here's how to connect AgFiniti® to MyAgData®.

1. On the Field Selection page, click Select on the **I have precision ag planting data from my field equipment** tile.
2. Choose AgFiniti from the cloud storage platform list.
3. Click **Connect**.
4. Choose your vendor from the list, then click **Connect**.

AgFiniti® Setup

You'll need to log in to your account and then click **Accept** to give MyAgData permission to access your account.

The image shows a web interface for requesting application details. It includes a title, web address, requested permission details, and a login section with username and password fields. There are also 'Accept' and 'Decline' buttons at the bottom.
